PROJECTS

C&R Compressor — *HTML5/CSS3/PHP/JAVASCRIPT*

C&R wanted to take advantage of web marketing. They reached out to us, and we developed a web asset for the company. I was assigned the role of lead development, under the direction of a project manager. Using modern web technologies, I created animations and interfaces from scratch.

Fresh Coders — *HTML5/CSS3/PHP/MySQL*

My fellow junior developers found Stack Overflow's user interface and terminology confusing. At the end of my PHP class, I developed Fresh Coders, A website that was focused around new programmers and Consisted of apparent terminology and a simple interface. It gave new programmers a place to learn.

EXPERIENCE

Sticky Cactus, McDonough, GA — *Server*

December 2017 - PRESENT

My job as a server is to take orders from customers and answer their questions. Next, I place the order in a dynamic system that sends the order to the kitchen. I then take their payments using HotSauce software on a tablet.

SKILLS

- ✓ HTML5
- ✓ CSS3/SASS
- ✓ JavaScript/GSAP
- ✓ PHP7
